

This Product has been especially commissioned for you and we hope you have many years of enjoyment from it.

Please Read Instructions

General

This product is designed to stand on a dresser or suitable top and is not designed to be wall mounted; we have wall mounted options for our larger pictures. To get the best from this product no back has been put on, allowing the light to show through from the back this is important for the effect. You may need to try placing it in a few different places before you are happy with the effect. The best position would be in front of a desktop light or by a large well lit window.

Assembly

We have ready assembled this product for you and no further assembly is required. The bracket has been designed to allow the frame to balance safely to give sufficient light behind the mirror without obstruction.

Cleaning

Any normal glass cleaner can be used on the surface of the mirror but please do not try to clean the back as this could damage the image. Be careful not to use the glass cleaner on the wooden frame as this could damage the polish (use normal household furniture polish for wood surfaces).

Safety

Our Laser Engraved Picture Mirror needs very little maintenance but we do ask that you be careful as the mirror is made of real glass and can break. If you break the mirror please use gloves to pick up the pieces and dispose in a safe way. This product should be kept out of reach of small children.

Should you break this mirror by accident we can send you a replacement glass with original picture as we store all our customers cut files. *(Please contact us for a price for replacing the mirror).*
